

Assessment Strand	Learning Goals/Concepts	Student Performance Objectives	Resources/Activities	Assessments	Terminology
3.3.5.A4 3.3.5.A5 4.2.5.A 3.2.5.A1	The cycling of water in and out of the atmosphere plays an important role in determining climatic patterns.	Students will be able to describe relationships between Earth's water and global/local weather systems.	FOSS WATER PLANET (Mandatory) C65 Weather Instruments		landform constructive force destructive force
3.3.6.A5	Global patterns such as the jet stream and water currents influence local weather (temperature, wind direction, wind speed, precipitation).	Students will be able to describe how weather conditions are measured.			
3.3.5.A5 3.3.6.A5 3.3.5.A3	Weather and climate can be compared and contrasted. The ocean affects climate. Thousands of layers of sedimentary rock confirm the long history of the changing surface of the Earth and the changing life forms whose remains are found in successive layers.	Students will be able to compare and contrast weather and climate.	Unit C Ch 1 Lesson 1 C5 Process Skill Tip - Observe C8 Reading Mini-Lesson - Use Reference Sources C4-5 Investigate Unit C Ch 1 Lesson 2 C12-13 Investigate C13 Process Skill Tip - Make a Model C16 Reading Mini-Lesson - Ident Cause and Effect Unit C Ch 1 Lesson 3 C20-21 Investigate C23 Investigation Challenge C24 Reading Mini-Lesson - Sequence C29 Model of the Earth	Ch 1 Test Performance Assessment C31 Perf Assessment AG 70-71 WB 146-162	erosion atmosphere water cycle geology geologic map troposphere meteorology
3.3.6.A6 3.3.6.A1 3.3.5.A3 3.3.5.A1	Earth's common physical features can be created using models. Earth's common features can be represented on various maps. Geological processes observed today such as erosion, movement of plates and changes in the atmosphere are similar to those in the past. Landforms result from forces such as erosion and destructive erosion and deposition of sediment.	Students will be able to use models to show common features of Earth's surface. Students will be able to explain how forces, such as erosion, can change the Earth's surface.	Unit C Ch 2 Lesson 1 C34-35 Investigate; Process Skill Tip (Inv Crystals) C37 Investigation Challenge C38 Reading Mini-Lesson - Use Reference Sources Unit C Ch 2 Lesson 2 C40-41 Investigate C43 Investigation Challenge C41 Process Skill Tip C43 Reading Mini Lesson - Summarizing C54-55 - Science and Technology C57 Activities for Home or School Unit C Ch 2 Lesson 3 C48-49 Investigate C49 Process Skill Tip - Make A Model Activities for Home and School	Chapter 2 Test Performance assessment C59 Writing Link C69 Perf Assessment AG 76-77 WB 164-180	rock cycle sedimentary igneous metamorphic seismic event topography composting geologic hazard

Assessment Strand	Learning Goals/Concepts	Student Performance Objectives	Resources/Activities	Assessments	Terminology
3.3.4.A2	Earth materials consist of rock, soil, water, and gases of the atmosphere.	Students will be able to name several resources/raw materials used by people.			
3.3.6.A2	Soil fertility, composition, and resistance to erosion are affected by many factors.				
3.3.5.A2	Humans use many of Earth's physical resources/raw materials.				
3.1.5.A2	Life on Earth depends on energy from the sun.				
CC.1.5	<p>Scientists engage effectively in collaborative discussions on science topics and texts, building on others' ideas and expressing their own clearly.</p> <p>Scientists report on topics or present opinions, sequencing ideas logically, using relevant facts, details, and data to support main ideas.</p> <p>Scientific relationships can be described using inference and prediction.</p>				
Health Resources/Activities					
10.1.A	The way our multiple body systems function determines our level of health.		Science Text R22-23; HWB22-24		
10.1.B					
10.1.C	The quality of information determines the wisdom of the choice.		Science Text R 36-37; HWB39-42		
10.1.D					
10.1.E					
10.2.A			Recommended Time Frame: 66-70 days		
10.2.D					
10.2.E					

Assessment Strand	Learning Goals/Concepts	Student Performance Objectives	Resources/Activities	Assessments	Terminology
	Changes in environmental conditions can affect the survival of populations and entire species.	Students will be able to describe some natural and human causes of extinction.	Unit B Ch 1 Lesson 1 B4-5 Investigate B5 Process Skill Tip - Observe and Infer B7 Reading Mini-Lesson - Predict Probable Future Actions and Outcomes		extinction threatened endangered
4.1.5.D 4.1.6.D	There are differences between threatened, endangered, and extinct organisms and reasons they become threatened, endangered, and extinct.	Students will be able to identify Pennsylvania plants and animals that are threatened and/or endangered and describe ways to protect them.	Unit B Ch1 Lesson 2 B12-13 Investigate B13 Process Skill Tip - Observe and Infer B16 Investigation Challenge		water cycle organisms wetland
4.2.5.B 4.2.6.B	Wetlands improve water quality by filtering waste materials and pollutants from the water; soils found in wetlands have certain characteristics.	Students will be able to identify the natural and human made factors that affect water quality.	B 21 Activities for Home or School WB 74-85 Project Wet: p. 204-205 "Water Cycle in a Jar" p. 201-203 "Water Models"		watershed lentic lotic
4.5.5.C 4.5.5.C	Point source pollution comes from a single identifiable source. Nonpoint source pollution originates from many locations that all discharge into single location.	Students will be able to compare and contrast point source pollution and nonpoint source pollution.	Unit B Ch 2 Lesson 3 B40-41 Investigate B41 Process Skill Tip - Gather Data and Infer Project Wild: p. 91-95 "Good Buddies" Project Learning Tree: Activity 88 "Life on the Edge"		point source pollution non-point source pollution
3.1.5.C1 3.1.6.C1	Compare and contrast learned and instinctive animal behavior that relate to survival.		Unit B Ch 2 Lesson 4 B48-49 Investigate B49 Process Skill Tip - Interpret Data and Infer B51 Reading Mini-Lesson - Identify Cause/Effect B52 investigation Challenge		abiotic biotic ground water
3.1.5.C2	Inherited characteristics may change over time as adaptations to the environment that allow for survival.		WB 97-108 Process Skill Tip B109		hydrology environment

Assessment Strand	Concepts	Student Performance Objectives	Resources/Activities (Optional)	Assessments (Optional)	Terminology
3.2.5.B1 3.2.6.B1	An object's change in position can be observed and measured.		Unit F Ch 1 Lesson 1 F4-5 Investigate F8 Investigation Challenge	Chapter 1 Test Perf Assessment	conduction convection
3.2.5.B1 3.2.6.B1	Changes in speed or direction of motion are caused by forces.	Students will be able to identify and describe forces and the effects forces have on other objects.	F7 Reading Mini Lesson-Supporting Facts and Details F5 Process Skill Tip Unit F Ch 1 Lesson 2	AG 137-138	radiation
3.2.5.B1	The greater the force, the greater the change in motion.	Students will be able to analyze and explain Newton's 3 Laws of Motion.	F14 Investigation Challenge F11 Process Skill Tip F13 Reading Mini Lesson - Cause and Effect	WB 290-306	gravity friction
3.2.5.B1	An object's position can be described in terms of its relationship to another object or a stationary background.	Students will be able to differentiate between kinetic and potential energy.	Unit F Ch 1 Lesson 3 F17 Process Skill Tip-Interpret Data/Draw Conclusions F20 Reading Mini-Lesson - Use Context Clues F27 Activities for Home or School		inertia velocity
3.2.5.B2 3.2.6.B2	Energy can be transferred from one form to another. Potential and kinetic energy can be compared and contrasted.	Students will be able to explain and give examples of how energy is transferred from one form to another.	Unit F Ch 2 Lesson 1 F32-33 Investigate/F33 Process Skill Tip -Hypothesize F35 Reading Mini-Lesson - Use Context Clues District Materials: "Soccer", "Try This"	Chapter 2 Test F37 Informal Assessment F57 Performance Assessment	momentum
3.2.5.B2 3.2.5.B3 3.2.5.B4	Energy, in the form of light, sound, heat, mechanical, electrical, and magnetism can be found in moving objects.	Students will be able to identify and different ways people use energy and explain the environmental impact in their use of energy.	Unit F Ch 2 Lesson 2 F38-39 Investigate F39 Process Skill Tip - Gather Data/Identify and Control Variables F44 Investigation Challenge	Performance Task: Demonstrate Newton's Laws and explain what happens.	potential energy kinetic energy
3.2.6.B3 3.2.6.B6	Heat flows from warmer objects to cooler objects	Students will be able to recognize and describe the relationships among speed, velocity, acceleration, and momentum, and how they are measured.	District Materials: "Balloon Staging", "Newton Car", "Rocket Car"	WB 308-324	balanced force unbalanced force
3.2.6.B3	Heat has an effect on particle motion during phase changes.		Unit F Ch 2 Lesson 3 F46-47 Investigate F52-53 Science and Technology F55 Activities for Home and School		mass model
